## Making Payments Using Matt Money

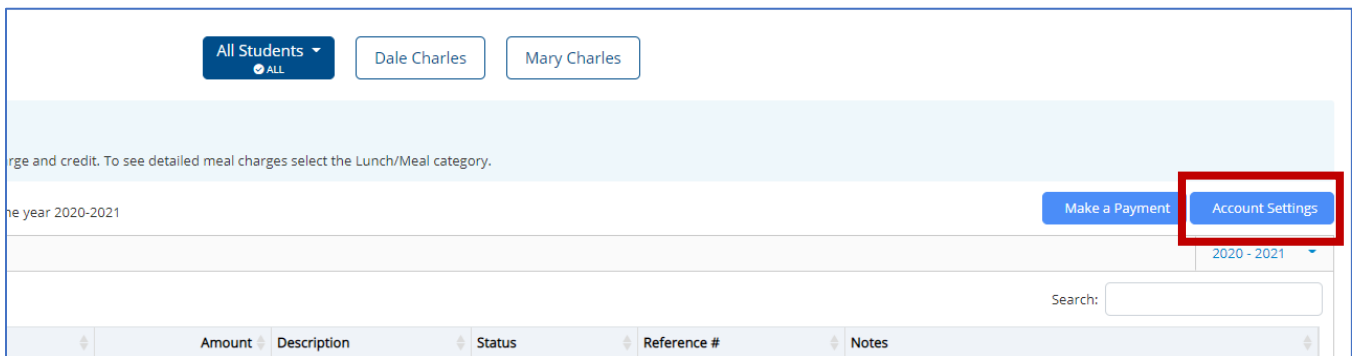

Payments may be made manually by the parent at any time once the eCheck account has been validated or the credit card information has been entered into the system.

## Automatic Payments

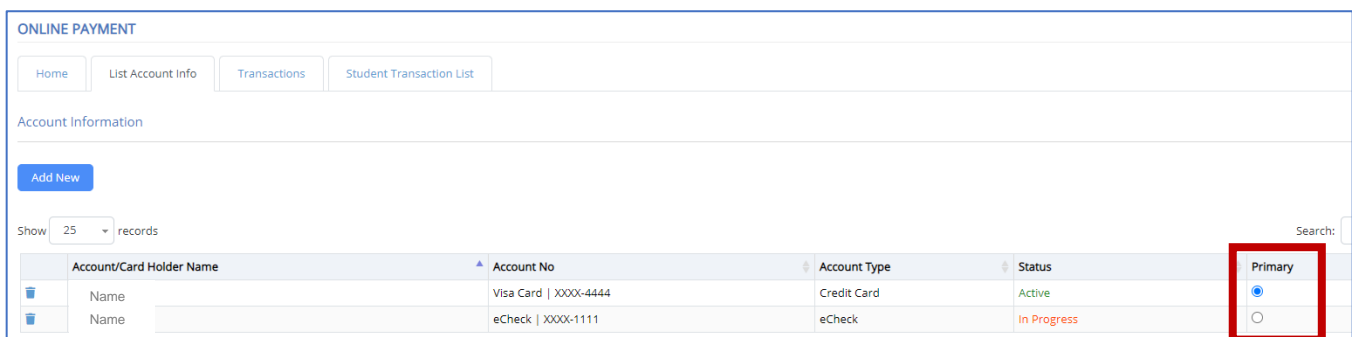

Schools have the option to create a charge that will deduct money from a parent’s bank account or charge a parent’s credit card automatically. Examples include monthly tuition payments or a one-time fee.

Parents must select which bank account or credit card will be used for automatic payments. This account/credit card is designated as the Primary Account.

Click **Account Settings** to view the payment information.

Click the radio button in the **Primary** column to select the account that will be used for automatic payments. The first account created by the parent will be selected as the default unless the parent selects a different account.

**Please contact your child’s school if you have questions regarding your Matt Money account.**
